

Core App Features

User Experience & Gameplay

- Scenario-based Bible learning quizzes
- Everyday life situations translated from Biblical teachings
- 4 answer choices per question:
 - Common/logical choice
 - Biblically correct choice
 - 2 alternative incorrect choices
- Two-attempt system per question
- Friendly, non-judgmental feedback for wrong answers
- Clear explanation of why the correct answer is right
- Explanation of why other options are incorrect

Content Structure

- 15 thematic topics (chapters)
- 10 questions per topic
- Total of 150 interactive levels
- Each question mapped to specific Bible teachings
- Bible verse references included for every question
- Modern-language explanations of verses
- Practical guidance on applying lessons in daily life

Progress & Completion

- Level-by-level progression system
- Topic-based learning flow
- Final completion message after finishing all levels
- Sense of achievement and learning milestone

Monetization

- First topic (10 questions) free
- In-app purchases to unlock additional topics
- \$0.50 per topic unlock
- Secure in-app purchases for iOS and Android

Design & Interface

- Clean, simple, and functional UI
- Minimalist, modern visual design
- Easy navigation and readability
- Focus on usability over complexity

Technical Features

- Cross-platform mobile app (iOS & Android)
- Flutter-based frontend
- Backend with user progress tracking
- AI-powered content support for:

- Verse explanations
 - Modern-day translations
 - Contextual understanding
- Secure authentication & data handling

Admin & Content Management

- Ability to manage topics and questions
- Update explanations and references
- Control pricing and free/paid content
- Monitor app usage and progress data

Deployment & Support

- App Store & Google Play deployment
- In-app purchase configuration
- Compliance with Apple & Google policies
- Bug fixing and performance optimization
- 60 days post-launch support
-
